## EDUCATION

|                                                                                                       |                                        |
|-------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>RNS Institute of Technology</b><br>Bachelor of Engineering   CSE (Data Science)   <b>GPA: 9.03</b> | Bengaluru, India<br><b>2023 - 2027</b> |
| <b>Expert PU College</b><br>PCMB   <b>Grade: 90.5%</b>                                                | Mangaluru, India<br><b>2021 - 2023</b> |

## SKILLS SUMMARY

- **Languages & Databases:** Python, R, C, SQL, MySQL, MongoDB, Firestore.
- **Machine Learning, Deep Learning & NLP:** Supervised & Unsupervised Learning, Neural Networks, CNN, RNN, Scikit-Learn, TensorFlow, Feature Engineering, Model Evaluation, Model Deployment, MLOps.
- **Generative AI:** Retrieval Augmented Generation (RAG), ReAct Agents & Tools, LLM Integration, LangChain, LangGraph, Embeddings, Vector Databases.
- **Data Analytics:** Pandas, NumPy, Data Cleaning, Data Visualization, EDA, Matplotlib, Seaborn, Tableau, Power BI.
- **Platforms:** VS Code, GitHub, Google Antigravity, Firebase, Streamlit, Render, Hugging Face, Docker.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                            |                  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| <b>Data Science Job Simulation   Lloyds Banking Group   <a href="#">LINK</a></b>                                                                                                                                                                                                                                                                           | <b>July 2025</b> |
| <ul style="list-style-type: none"><li>◦ Performed EDA and preprocessing on a churn dataset using Python, with feature encoding and scaling.</li><li>◦ Built and evaluated machine learning classification models for churn prediction, achieving 77% accuracy and identifying target class imbalance as a key factor limiting model performance.</li></ul> |                  |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                       |                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>End-to-End Agentic RAG System (Document, Web &amp; Wikipedia Search)   <a href="#">CODE</a>   <a href="#">LIVE</a></b>                                                                                                                                                                                                                                                             | <b>May 2026</b>      |
| <ul style="list-style-type: none"><li>◦ Built an agentic RAG system with conversational memory supporting PDFs, text files, and website URLs.</li><li>◦ Implemented a ReAct agent with LangChain and LangGraph for vector search, Wikipedia search and web search.</li><li>◦ Integrated Gemini 2.5 Flash with Google AI embeddings for accurate, grounded responses.</li></ul>        |                      |
| <b>Stock Movement Reason Finder   <a href="#">CODE</a>   <a href="#">LIVE</a></b>                                                                                                                                                                                                                                                                                                     | <b>March 2026</b>    |
| <ul style="list-style-type: none"><li>◦ Built a FastAPI based tool to analyze NIFTY100 stock movements, identifying top gainers and losers.</li><li>◦ Integrated Google News RSS and Gemini AI to explain major price spikes with real time news reasoning.</li><li>◦ Designed a modular backend for stock data fetching, news aggregation, and AI based insights.</li></ul>          |                      |
| <b>Multi-Language Invoice Q&amp;A System   <a href="#">CODE</a>   <a href="#">LIVE</a></b>                                                                                                                                                                                                                                                                                            | <b>February 2026</b> |
| <ul style="list-style-type: none"><li>◦ Converts invoices (PDF/images) into PNG bytes for direct Gemini analysis without OCR.</li><li>◦ Uses Gemini 2.5 Flash to answer user questions in English and all Gemini supported languages.</li><li>◦ Extracts key information from uploaded invoice documents (PDF/images) efficiently.</li></ul>                                          |                      |
| <b>End-to-End Movie Review Sentiment Analysis With MLOps   <a href="#">CODE</a>   <a href="#">LIVE</a></b>                                                                                                                                                                                                                                                                            | <b>November 2025</b> |
| <ul style="list-style-type: none"><li>◦ Fine-tuned a DistilBERT model on the IMDB dataset, achieving 92% test accuracy for sentiment classification.</li><li>◦ Built a FastAPI-powered inference API and Streamlit UI for real-time movie review sentiment prediction.</li><li>◦ Implemented Docker, PyTest, and GitHub Actions CI/CD for automated testing and deployment.</li></ul> |                      |

## ACHIEVEMENTS

- Developed a production-ready fish delivery web application for a local fish business ([macchikart.in](http://macchikart.in)), with Firestore and Firebase Hosting, featuring guest checkout, cash-on-delivery, order tracking, and an admin portal.
- Developed and deployed a portfolio website for an educational Institution [BA School & College](#) and [BA ITI](#).
- Contributed to the development of the PDF utility web app ([TryMyPDF](#)), implementing core browser-based PDF processing features and supporting web app deployment as part of the development team.
- Solved 250+ [LeetCode](#) problems in Python, SQL, and Pandas.

## CERTIFICATES

- **IBM RAG & Agentic AI Professional Certificate | [CERTIFICATE](#)**
- **Ultimate RAG Bootcamp Using Langchain, LangGraph & Langsmith | [CERTIFICATE](#)**
- **DeepLearning.AI TensorFlow Developer Professional Certificate | [CERTIFICATE](#)**
- **IBM Data Science Professional Certificate | [CERTIFICATE](#)**
- **Complete Data Science, Machine Learning, DL, NLP Bootcamp | [CERTIFICATE](#)**
