WORK EXPERIENCE

Data Science Job Simulation Lloyds Banking Group LINK	July 2025
◦ Performed EDA and preprocessing on a churn dataset using Python, with feature encoding and scaling. ◦ Built and evaluated machine learning classification models for churn prediction, achieving 77% accuracy and identifying target class imbalance as a key factor limiting model performance.	

PROJECTS

End-to-End Agentic RAG System (Document, Web & Wikipedia Search) CODE LIVE	March 2026
◦ Built an agentic RAG system with conversational memory supporting PDFs, text files, and website URLs. ◦ Implemented a ReAct agent with LangChain and LangGraph for vector search, Wikipedia search and web search. ◦ Integrated Gemini 2.5 Flash with Google AI embeddings for accurate, grounded responses.	
Stock Movement Reason Finder CODE LIVE	December 2025
◦ Built a FastAPI based tool to analyze NIFTY100 stock movements, identifying top gainers and losers. ◦ Integrated Google News RSS and Gemini AI to explain major price spikes with real time news reasoning. ◦ Designed a modular backend for stock data fetching, news aggregation, and AI based insights.	
Multi-Language Invoice Q&A System CODE LIVE	November 2025
◦ Converts invoices (PDF/images) into PNG bytes for direct Gemini analysis without OCR. ◦ Uses Gemini 2.5 Flash to answer user questions in English and all Gemini supported languages. ◦ Extracts key information from uploaded invoice documents (PDF/images) efficiently.	
Movie Review Sentiment Analysis CODE LIVE	August 2025
◦ Built a Streamlit app using a fine-tuned DistilBERT model to classify reviews as Positive or Negative. ◦ Achieved 92% test accuracy with robust tokenization using Hugging Face Transformers. ◦ Displays predictions with confidence scores for better interpretability.	

ACHIEVEMENTS

- Developed a production-ready fish delivery web application for a local fish business (macchikart.in), using React, Firestore and Firebase Hosting, featuring guest checkout, cash-on-delivery, order tracking, and an admin portal.
- Developed and deployed a responsive portfolio website for an Institution ([BASchool](#)), highlighting campus life, institutional information, academic programs, admissions, and facilities.
- Contributed to the development of the PDF utility web app ([TryMyPDF](#)), building core features for common PDF operations as part of the development team.
